Mack Trucks' Roanoke Valley Operations Begins Full Production of Mack® MD Series

GREENSBORO, NC (Sept. 22, 2020) – Mack Trucks' all-new Mack® MD Series of medium-duty vehicles is now in full production at Mack's new Roanoke Valley Operations (RVO) facility in the Roanoke Valley, Virginia.

“Mack Trucks is very proud of the dedication of the RVO team, who worked tirelessly to begin full production amidst the challenges of COVID-19,” said Martin Weissburg, president of Mack Trucks. “Mack is 120 years old this year, and as we have done all along, we continue to solidify our leadership in the industry by offering customers the right products with the right features.”

The Mack MD6, a Class 6 model, and the MD7, a Class 7 model, began rolling off the line Sept. 1 in preparation for delivery to dealers and customers.

“Mack Trucks is pleased that our new MD Series is being delivered to customers as we speak, and the feedback has been very positive,” said Jonathan Randall, Mack Trucks senior vice president of North American sales and commercial operations. “Fulfilling our promise to deliver high-quality, medium-duty trucks reinforces our commitment to supply product offerings that meet a variety of customer needs across the full commercial truck range.”

Mack announced Jan. 30, 2020 that it invested \$13 million to establish RVO. The investment included equipment, tooling and enhancements to the 280,000 square feet of the facility dedicated to producing Mack medium-duty trucks. The project will result in the creation of 250 jobs, which will be filled by the end of February 2021.

“Every member of the RVO team takes great pride in working at the site where Mack medium-duty vehicles are built,” said Antonio Servidoni, Mack vice president, medium-duty operations. “We are already building Mack MD Series trucks to the same high-quality standards as our heavy-duty product line.”

The Mack MD Series is an all-new model range built specifically for medium-duty applications. With the introduction of the MD6, which has a Gross Vehicle Weight Rating (GVWR) of 25,995 pounds, and the MD7, which has a GVWR of 33,000 pounds, Mack now offers a complete lineup of Class 6 to Class 8 vehicles. Both models are exempt from the 12 percent Federal Excise Tax (FET).

The MD6 and MD7 models meet the needs of medium-duty trucking applications requiring dry van/refrigerated, stake/flatbed, dump and tank truck vocations. The MD6 model does not require a Commercial Driver's License (CDL) to operate for non-hazardous payloads.

Available in 4x2 configurations, the MD6 and MD7 models feature a sharp wheel cut for enhanced maneuverability for tough urban settings. The MD Series cab design features an industry-best bumper-to-back-of-cab (BBC) measurement of 103 inches. Mack mimicked the bold styling of the cab, hood and grille of the Mack Anthem®, Mack's highway model. The Mack MD Series will be supported by Mack's extensive dealer network.

Customers interested in the Mack MD Series can visit their local Mack dealer or www.macktrucks.com.

Dedicated to durability, reliability and meeting the needs of customers, Mack Trucks has provided purpose-built transportation solutions for more than a century. Today, Mack is one of North America's largest producers of heavy-duty trucks, and Mack® trucks are sold and serviced through an extensive distribution network in more than 45 countries. Mack trucks, diesel engines and transmissions sold in North America are assembled in the United States. Mack manufacturing locations are certified to the internationally recognized ISO 9001 standard for quality, ISO 14001 standard for environmental management systems and OHSAS 18001 standard for health and safety management systems. Mack is also a proud sponsor of Share the Road, an American Trucking Associations public information campaign aimed at enhancing the safety of our nation's roadways.

Mack Trucks is part of the Volvo Group, which is driving prosperity through transport solutions by offering trucks, buses, construction equipment, power solutions for marine and industrial applications, financing and services that increase customer uptime and productivity. Founded in 1927, the Volvo Group is committed to shaping the future landscape of sustainable transport and infrastructure solutions. The Volvo Group is headquartered in Gothenburg, Sweden, employs 104,000 people and serves customers in more than 190 markets. In 2019, net sales amounted to about \$45.7 billion. Volvo shares are listed on Nasdaq Stockholm. For more information, please visit www.volvolgroup.com.
